

WIZARD GOLD ARC SUBEMERGE 1000I

- ADVANCED IGBT Technology, Inverter frequency is 20Khz, reducing the volume and weight of the welder.
- Huge reduction in magnetic loss obviously enhances the welding efficiency and energy saving effect.
- Switching frequency is beyond audiorange, which almost eliminates noise pollution.
- Automatic retracting arc ignition circuit. PWM wire feeding control.
- Arc Voltage compensation function, providing a good condition for welding.
- The power source can also be used for MMA welding and air carbon arc gouging.
