

WIZARD GOLD PUG MACHINE

Pug cutting machine comes to cater with an unique speed control switch to MS plates of different thickness without any manual intervention. The machine moves on an aluminum track that is specially designed to provide accurate straight cuts and also come with an optional attachment to provide accurate cuts in circular orientation. Wizard pug cutting machine can moves in forward and reverse direction with a click of a switch. We provide an extra toggle switch to full fill the requirement of extra slow speed of the machine.

Technical Parameters	
Voltage	230V AC/DC 50 Hz
Current	0.350A max.
Cutting Speed	50 to 900 mm/min. approx.
Cutting Capacity	up to 100 mm thick MS (& above by change cutting nozzle)
Bevel (up to 45 dig.)	50 mm thick MS
Circle	75mm to 1100mm dia
Cutting Adjustment	Horizontal 80mm & Vertical 60 mm
Speed Control	Rotary Resistance
Weight of Machine	8.5 Kg Approx.

FEATURES

New Design, Smart Appearance
Compact Size, Lightweight and Power Saving

Strong Current Output, Superior Arc Performance
Quality Weld with Precise Control
